Topcreativity Tutorials

In this manual, we will walk you through various aspects of using Photoshop. This is the perfect place to start if you've never used Photoshop before. Even if you're an experienced Photoshop user, so we recommend reading through the tutorials again.

The best way to get started is to read all the tutorials in the Basics section in order. Each of these tutorials builds on skills learned in the earlier ones, and one-by-one will get you up to speed with Photoshop basic Quick Start. Once you're comfortable working in Photoshop, then you can move on to the other tutorial sections. You don't have to read them all (although that probably wouldn't hurt), but choose the ones that address the specific techniques you want to learn about.

Once you've finished the tutorials, you should be comfortable enough to continue on your own.

How to Customize Photoshop Keyboard Shortcuts

Go to Edit > click on Keyboard Shortcuts

Select any of the option you want to edit

And you're done!

Brief Understanding of Photoshop Tool

-  Move Tool (V) use to move selections or layers
-  Rectangular Marquee Tool (M) Use to select an area in your image in a rectangular box. Hold the Shift key to make the selection a square
-  Elliptical Marquee Tool (M) Selects an area in your image in an elliptical shape. Hold the Shift to make the selection a circle
-  Lassa Tool (L) Selects an area in your image in a free-form shape.
 Magnetic Lassa Tool (L) Selects part of an image by selecting the high-contrast edges around a shape
-  Polygonal Lassa Tool (L) Draws Straight-edged segments of a selection border.
 Quick Selection Tool (A) Makes a selection based on color and texture similarity when you click or click-drag the area you want to select.
-  Magic Wand Tool (A) Selects the pixels with similar colors in a single click.
 Refine Selection Brush Tool (A) Adds or removes areas to and from a selection by automatically detecting the edges.
-  Spot Healing Brush Tool (J) Removes spots from your photos
 Healing Brush Tool (J) Removes spots from your photo by selecting a part of your photo as the reference point.
-  Clone Stamp Tool (S) Paints with an image sample, which you can use to duplicate objects, remove image imperfections, or paint over objects in your photo. You can also clone part of an image to another image.
-  Pattern Stamp Tool (S) Paints with a pattern defined from your image, another image, or a preset pattern
-  Blur Tool (R) Softens hard edges or areas in an image by reducing details.
 Sharpen Tool (R) Sharpens a photo by focusing soft edges in the photo to increase clarity or focus.
-  Smudge Tool (R) Simulates the actions to dragging a finger through wet paint.

The tool picks up color where the stroke begins and pushes it.

Sponge Tool (O) Changes the color saturation of an area.

Dodge Tool (O) Lightens areas of an image. You can use the tool to bring out details in shadows.

Burn Tool (O) Darkens areas of the image you can use the tool to bring out details in highlights.

Brush Tool (B) Creates soft or hard strokes of color. You can use it to simulate airbrush techniques.

Color Replacement Tool (B) Simplifies replacing specific colors in your image.

Erase Tool (E) Erases the pixels in the image as you drag through them.

Background Eraser Tool (E) Turns color pixels to transparent pixels so that you can easily remove an object from its background.

Magic Eraser Tool (E) Changes all similar pixels when you drag within a photo. Paint Bucket Tool (K) Fills an area that is similar in color value to the pixels you

click

Gradient Tool (G) Fills in an area of image by a gradient.

Color Picker Tool (I) Copies or samples the color of an area in your photo to set a new foreground or background color.

Custom Shape Tool (U) Provides different shape options for you to draw.

When you select the Custom Shape Tool, you can access these shapes in the Tool Option Bar.

The other shape-related tools available in the tool options bar are:

Rectangle

Rounded rectangle

Ellipse

Polygon

Star

Line

Type Tool (T) Creates and edits text on your Image

Pencil Tool (N) Creates hard-edged freehand lines.

 Crop Tool (C) Trims the part of an image according to the selection.
Cookie Cutter Tool (C) Crops a photo into a shape that you choose

 Perspective Crop Tool (C) Transforms the Perspective of a picture while cropping it.

 Content Aware Move Tool (Q) Selects an object in your photo and moves the selection to a different location, or extends it.

Understanding the Concept of Layers

Layers are like a separate sheet of paper arranged in a sequence to create an exceptional images.

They allow you to work non-destructively by stacking images on top of other images without interacting and mixing the pixels of images. "Layer" is the only thing that makes Photoshop an amazing photo editing and compositing tool.

Understanding the Concept of Layer Mask

Layer Masking is a nondestructive way to hide(transparent) parts of an image or layer without erasing them.

Painting the Mask Black hides any object on that layer,

Painting the mask white reveals any object on that layer.

Masking are great for making image composites, modifying background colors, removing or cutting out objects and targeting your edits, so they affect only certain areas, rather than the entire layer

Color Grading Tutorials

Color Grade in Just a Click!

Link: <https://youtube.com/shorts/MVx1yyK5oV4?feature=share>

Click on the adjustment layer icon and select curve adjustment

Click on the curve option bar and select auto option...

Select Enhance Per Channel Contrast

And you're done.

Skin Retouching Tutorials

How to Smoothing Skin in Seconds!

Link: <https://youtube.com/shorts/hQ5AO7w7pLc?feature=share>

Make a duplicate of the layer and go to filter, blur – click on Gaussian blur, blur to the point where the skin appear smooth.

Click on the layer mask icon to add layer mask and invert the mask

Layer Mask Icon

Select the brush tool, set brush hardness to 0%, brush opacity to 20%, brush all over the skin to make it smooth and add Curve adjustment.

And you're done.

Skin Blemishes Tutorials

Secrets to Remove Acne in Photoshop!

Link: https://youtube.com/shorts/Ukx_tvQHupo?feature=share

Make a duplicate of the layer and go to Filter – Others – select High Pass Filter

Set radius below 2pixels hit ok and changes it blending mode to overlay

Create a new layer below the high pass layer and select the brush tool; set opacity below 20% and brush all over the skin this removes the redness cause by acne.

Next step

Merge all layers

Make a duplicate of the merged layer and go to filter – Other – select High Pass Filter

Keep radius below 1pixels > hit ok and change it blending mode to > Overlay
Make a duplicate of the background layer and go to Filter > Blur > Gaussian Blur >
Blur to the point where you cannot see the acne > hit ok
Add layer mask and invert it

Select the brush tool set opacity below 20% and brush all over the skin

And you're done.

Resolution Tutorials

Convert Low Resolution Graphic to High Resolution Graphic!

Link: <https://youtube.com/shorts/yC5FUB34xf0?feature=share>

Increase the size of image to 2000pixels,

Go to filter – Blur – select Gaussian Blur, blur to the point where you cannot see the pixilation

Go to image > Adjustment > Curves

and the right slider to the left, so that the light gray areas become absolutely white and take the left slider to the right so that the light black areas become absolutely black making the edges dark sharp

And you're done.

Dark Cycles Tutorials

Photoshop Easiest Way to Remove Dark Cycles!

Link: https://youtube.com/shorts/J8_t5eY5wy8?feature=share

Make a duplicate of the background layer and go to Filter – Others – select High Pass Filter and set radius below 1.0pixels

Change it blending mode to overlay

27 TOPCREATIVITY

Tutorial Manual

Create a new layer below the high pass filter layer, select the brush tool, set opacity below 15% and take a sample of the skin tone and brush all over the dark areas around the eyes

and you're done.

Damaged Eye Tutorials

Easy Tricks to Fix Damaged Eye!

Link: <https://youtube.com/shorts/1igJ6A9UM5M?feature=share>

Double click on the right side of the background layer to unlock the layer and Make a selection of the undamaged eye and duplicate.

Transform and place it perfectly on the damaged eye

Hold Ctrl/Cmd and click on the thumbnail to make selection. Go to select >Modify and contract by 3pixels and delete from the bottom layer

Select both layers and go to Edit>Auto-Blend Layers

Select Panorama Blend Method and hit ok

You're done!

Selecting Transparent Object Tutorials

Secrets to Select Transparent Object In Photoshop

Link: https://youtube.com/shorts/3nvA_Nfnp5s?feature=share

Make selection of the object and duplicate

Add another background below the duplicated layer and make selection of the wine in the cup

Duplicate, click on the adjustment layer icon and select Hue/Saturation

Clip it to the layer below by clicking on the clipping icon and take the saturation slider all the way down.

Add layer mask to the duplicated object layer,

select brush tool, set brush opacity to 26% and brush all over the glass cup set the wine opacity to 90%

And you're done.

Color Correction Tutorials

Color Correction in Photoshop!

Link: https://youtube.com/shorts/UKdIs_oIGUI?feature=share

Click on the adjustment layer icon and select Color Balance

(In this case there is lot of green in this image) Reduce the amount of green

Click on the adjustment layer icon and select Brightness/Contrast

Increase the contrast of the image

And you're done!

Signature Tutorials

Make Your Signature Digital!

Link: <https://youtube.com/shorts/D6tze5tq1II?feature=share>

Go to layer channel and select the red channel

Hold Ctrl/Cmd + M Take the right slider to the left and the right slider to the left

Hold Ctrl/Cmd and click on the red channel thumbnail to make selection
Press Ctrl/Cmd+Shift+I to invert the selection,
Hide the original layer and create a solid color fill

And you're done!

Color Tutorials

Right Way to Change Color in Photoshop!

Link: <https://youtube.com/shorts/4qFADoDCC7c?feature=share>

Make selection of the object and duplicate thrice

Click on the first duplicated layer and go to adjustment layer icon, solid color

clip to the layer below

Click on the second duplicated layer and change it blending mode to Linear Dodge

the third duplicated layer to Linear Burn

Click on the layer Linear Dodge layer and hold Ctrl/Cmd + I and then take the right slider under the output levels to the left

and you're done.

Graphics Tutorials

New Tricks to Add Graphics to Complex Perspective!

Link: <https://youtube.com/shorts/cvuYZtuCgAg?feature=share>

Make selection of the subjects and duplicate

Bring the graphic below the subject layer and change it blending mode to softlight

Double click on the right hand side of the layer and take the left slider of the underlying layer to the right

And you're done.

Glow Effect Tutorials

Create Glowing Effect in 15 Seconds!

Link: <https://youtube.com/shorts/XfL9DtErVJY?feature=share>

Make a selection of the area you want to apply the glow effects and duplicate

Click on the adjustment layer icon and select Color Lookup > Moonlight.3DL

Click on the adjustment layer icon again and select Curves adjustment

Double click on the duplicated layer(shortcut to reveal layer blending options), click on Drop Shadow > Change blend mode to screen, distance to 0px and increase size to 250px

Repeat same step for Outer Glow, Inner Glow and Inner Shadow.

Now make a duplicate of the background layer and drag it up above the level layer, add layer mask and invert mask

Select your brush tool, set brush opacity below 20%, foreground color to white

Brushing concept: Brush hard on the area close to the light and brush less on the area far from the light.

Now, create a solid color fill and clip it to the layer below

and change it blending mode to color

reduce layer opacity to 82%.

You're done!

Number Plates Tutorials

Quickest Way to Remove Number Plates in Photoshop!

Link: https://youtube.com/shorts/ryrfPrZ1_B0?feature=share

Select the Spot Healing Brush Tool

and brush all over the numbers and you're done

Tricks in Photoshop

Easy Tricks to Turn Night into Day

Link: <https://youtube.com/shorts/zHWV7LKkdCM?feature=share>

Make a duplicate of the background layer and change it blending mode to screen,

This makes the darkness bright a little, duplicate more to brighten even more.

And you're done!
